

ABOUT ME

I'm a mechanical engineer and a system developer. My multidisciplinary background helps me understand the needs and challenges that people of different backgrounds face. This makes me an excellent problem-solver and team-player.

Background:

I started out as a mechanical engineer, but I have since then broadened my competence to include electronics and software. The reason behind this change was simple, I love to create things and learn about new technologies. Through my experience I have realized what I love the most is tinkering on electrical systems and to iterate on software.

EMPLOYMENT HISTORY

Alten Sverige AB *2018-06-01 .. ongoing*

At Alten I have worked with wide range different projects. Within product development I have worked with mechanical-design, electronics and software development. See the project sections for details.

Role & Responsibilities

Product development, consulting.

consulting

Materials Research *2015-08-01 .. 2016-09-01*

At **Jönköping University** I supported research activities as a lab-technician.

Role & Responsibilities

CNC-machining, test-rigs, assisting with experiments.

SolidWorks

MasterCam

LabView

MECHATRONIC PROJECTS

Professional experience of electronics and embedded systems.

Medical Device 2021-09-01 .. 2022-02-01

Developed **Multi4**, a device for taking biopsy samples for cancer-diagnostics.

Role & Responsibilities

Firmware for embedded device, mechanical design, prototyping and testing.

Arduino

SolidWorks

Hygiene Device 2021-05-01 .. 2021-10-01

Developed the **Paprtect** prototype, a finger cover dispenser for public touchscreens.

Role & Responsibilities

Firmware for embedded device, pcb design, prototyping and testing.

Arduino

KiCad

IoT Device 2020-12-01 .. 2022-12-01

Developed proof of concept for **Progressive Safety**.

Role & Responsibilities

Firmware for development boards, testing and PCB cost estimates.

Arduino

C++

BlueTooth

Electric Forklift 2019-03-01 .. 2019-08-01

Helped **Helge Nyberg** develop an electric forklift for indoor use. The forklift uses force sensors instead of a conventional user interface.

Role & Responsibilities

Firmware for processing user input to actions and emulation of inertia.

Arduino

MECHANICAL PROJECTS

Professional experience of mechanical product development.

Mechatronic Components 2022-04-01 .. 2021-01-01

Helped **Husqvarna** with product maintenance and development of motor controllers, HMI panels and motors used in handheld battery powered products.

Role & Responsibilities

Coordinated product development between different **Husqvarna** sites and subcontractors. Mechanical design and configuration management of mechatronic components.

CATIA

SmarTeam

Teams

Disposable Medical Device 2020-03-01 .. 2020-06-01

Designed a disposable flashlight for gynecology examinations.

Role & Responsibilities

Mechanical design and testing.

SolidWorks

Automotive Accessories 2018-04-01 .. 2020-04-01

At **Thule** I developed torque keys, load carries and roof boxes. I also developed a friction drilling production method and helped with migration from version control systems.

Role & Responsibilities

Mechanical design, testing, prototyping and production development.

SolidWorks

SmarTeam

YaPdm

SOFTWARE PROJECTS

Professional experience of software development.

Desktop CAD App 2022-08-01 .. ongoing

Created an application for **CerInvent** that allows the user to generate molds for manufacturing dental crowns.

Python

NumPy

SciPy

PyQt

PyMadCad

Gmsh

PyVista

CATIA

GitHub

CI/CD

AI Student Workshop 2022-06-01 .. ongoing

Helped **Alten** attract students by preparing a workshop for Machine-Learning master students. [Repository](#)

Role & Responsibilities

Preparation of source code and data for the event. Deployment example using Flask.

Python

NumPy

Pandas

TensorFlow

Keras

Flask

RNN

GitHub

Docker

DigitalOcean

MedTech Startup 2020-12-01 .. 2022-12-01

Started the company **Orthovelox AB**, that aims to produce innovative solutions for orthopedic healthcare. Orthovelox develops design software based on 3D scanning.

Role & Responsibilities

Product Development, Software development, Project-Lead, Fund raising.

Python

NumPy

SciPy

PyVista

GitHub

CI/CD

Azure

PyTest

mypy

3D-Modeling

SIDE PROJECTS AND AUTODIDACTISM

Various for fun projects that have improved my skills.

sondell.org 2024-02-01 .. ongoing

To learn about server fundamentals I selfhost a number of services for my family here: [myhome](#). Instead of relying on docker, I opted use nix to achieve better reproducibility.

web linux nix hosting nextcloud matrix mailserver git-server

Product Configurator 2023-11-14 .. 2023-12-01

A proof of concept where a [chair](#) rendered as a 3D model and based on meta-data about the 3D model a number UI elements are dynamically generated. So that same binary application could be used show how many different products can be configured. Only the frontend was made. [Repo](#)

Rust egui three-d GitHub cross-platform web windows linux

delamat.se 2023-09-04 .. ongoing

A sideproject where the plan is to make a website where users can share recipes and shoppinglists. The main purpose of this sideproject is learning how to use htmx and axum in practice. [Repo](#). Website: *Not yet deployed*.

Rust CSS HTMX axum sqlx GitHub open-source

halfedge lib 2023-05-24 .. ongoing

I have been frustrated with available libraries for rust and python for boolean operations on 3D-models. Therefore I started this project that aims to provide an opensource rust library with python bindings. The ambition is to provide robust boolean operations on halfedge datastructures. The project is heavily inspired by the white paper: [Exact, robust, and efficient regularized Booleans on general 3D meshes](#). [Repo](#).

Rust 3D-Modeling GitHub open-source

Web Resume 2023-02-01 .. ongoing

I maintain my resume as a website and the source code is available at [GitHub](#).

HTML CSS Tera Zola SSG open-source GitHub

WASM Web App 2023-01-01 .. 2023-01-10

Implemented [Conway's Game of Life](#) as a [webb app](#) using rust. [Repo](#)

WASM Rust HTML CSS GitHub

Python Cad Library 2022-12-01 .. ongoing

I contribute to the capabilities of [MADCAD](#), an opensource python CAD library.

Python Numpy PyTest open-source GitHub

Daily Driver: NixOS 2022-11-01 .. ongoing

I use Linux for both work and personal projects. Currently I use NixOS and benefits from the robust development environments it offers.

Linux Nix

Embedded Rust 2022-07-01 .. 2022-10-01

I made simple data acquisition firmware using rust for stm32 and nrf52 development boards. As a compliment I also made a desktop app to plot values from the devices.

Rust USB nrf52 stm32

The Rust Book 2022-05-01 .. 2022-07-01

Taught myself rust using the [Book](#) and fell in love.

Rust

FORMAL EDUCATION

Just a starting point...

Master: Mechanics 2016-08-01 .. 2018-06-01

At **Jönköping University** I studied product development, materials engineering and design optimization.

SolidWorks CATIA FEA MatLab Visual Basic

Project: Solar Car 2014-08-01 .. 2015-12-01

Designed and built a solar powered car. Competed with the car in the [World Solar Challenge](#), a 3000km long race on the public roads of Australia.

Role & Responsibilities

System Engineering, Battery and Solar Panel design, CNC-machining.

SolidWorks FEA MasterCam Arduino

Bachelor: Mechanics 2012-08-01 .. 2017-06-01

At **Jönköping University** I studied product development, materials engineering and design automation.

SolidWorks FEA MatLab Visual Basic PLC
