

## ABOUT ME

---

I'm a mechanical engineer and a system developer. My multidisciplinary background helps me understand the needs and challenges that people of different backgrounds face. This makes me an excellent problem-solver and team-player.

### Background:

I started out as a mechanical engineer, but I have since then broadened my competence to include electronics and software. The reason behind this change was simple, I love to create things and learn about new technologies. Through my experience I have realized what I love the most is tinkering on electrical systems and to iterate on software.

## EMPLOYMENT HISTORY

---

### Alten Sverige AB 2018-06-01 .. ongoing

At Alten I have worked with wide range different projects. Within product development I have worked with mechanical-design, electronics and software development. See the project sections for details.

#### *Role & Responsibilities*

Product development, consulting.

consulting

### Materials Research 2015-08-01 .. 2016-09-01

At **Jönköping University** I supported research activities as a lab-technician.

#### *Role & Responsibilities*

CNC-machining, test-rigs, assisting with experiments.

SolidWorks

MasterCam

LabView

## MECHATRONIC PROJECTS

---

*Professional experience of electronics and embedded systems.*

### **Medical Device** 2021-09-01 .. 2022-02-01

Developed **Multi4**, a device for taking biopsy samples for cancer-diagnostics.

*Role & Responsibilities*

Firmware for embedded device, mechanical design, prototyping and testing.

Arduino

SolidWorks

### **Hygiene Device** 2021-05-01 .. 2021-10-01

Developed the **Paprtect** prototype, a finger cover dispenser for public touchscreens.

*Role & Responsibilities*

Firmware for embedded device, pcb design, prototyping and testing.

Arduino

KiCad

### **IoT Device** 2020-12-01 .. 2022-12-01

Developed proof of concept for **Progressive Safety**.

*Role & Responsibilities*

Firmware for development boards, testing and PCB cost estimates.

Arduino

C++

BlueTooth

### **Electric Forklift** 2019-03-01 .. 2019-08-01

Helped **Helge Nyberg** develop an electric forklift for indoor use. The forklift uses force sensors instead of a conventional user interface.

*Role & Responsibilities*

Firmware for processing user input to actions and emulation of inertia.

Arduino

## MECHANICAL PROJECTS

---

*Professional experience of mechanical product development.*

### **Mechatronic Components** 2022-04-01 .. 2021-01-01

Helped **Husqvarna** with product maintenance and development of motor controllers, HMI panels and motors used in handheld battery powered products.

*Role & Responsibilities*

Coordinated product development between different **Husqvarna** sites and subcontractors. Mechanical design and configuration management of mechatronic components.

CATIA

SmarTeam

Teams

### **Disposable Medical Device** 2020-03-01 .. 2020-06-01

Designed a disposable flashlight for gynecology examinations.

*Role & Responsibilities*

Mechanical design and testing.

SolidWorks

### **Automotive Accessories** 2018-04-01 .. 2020-04-01

At **Thule** I developed torque keys, load carries and roof boxes. I also developed a friction drilling production method and helped with migration from version control systems.

*Role & Responsibilities*

Mechanical design, testing, prototyping and production development.

SolidWorks

SmarTeam

YaPdm

# SOFTWARE PROJECTS

---

*Professional experience of software development.*

## **Desktop CAD App** 2022-08-01 .. ongoing

Created an application for **CerInvent** that allows the user to generate molds for manufacturing dental crowns.

Python

NumPy

SciPy

PyQt

PyMadCad

Gmsh

PyVista

CATIA

GitHub

CI/CD

## **AI Student Workshop** 2022-06-01 .. ongoing

Helped **Alten** attract students by preparing a workshop for Machine-Learning master students. [Repository](#)

*Role & Responsibilities*

Preparation of source code and data for the event. Deployment example using Flask.

Python

NumPy

Pandas

TensorFlow

Keras

Flask

RNN

GitHub

Docker

DigitalOcean

## **MedTech Startup** 2020-12-01 .. 2022-12-01

Started the company **Orthovelox AB**, that aims to produce innovative solutions for orthopedic healthcare. Orthovelox develops design software based on 3D scanning.

*Role & Responsibilities*

Product Development, Software development, Project-Lead, Fund raising.

Python

NumPy

SciPy

PyVista

GitHub

CI/CD

Azure

PyTest

mypy

3D-Modeling

## SIDE PROJECTS AND AUTODIDACTISM

---

*Various for fun projects that have improved my skills.*

**sondell.org** 2024-02-01 .. ongoing

To learn about server fundamentals I selfhost a number of services for my family here: [myhome](#). Instead of relying on docker, I opted use nix to achieve better reproducibility.

web linux nix hosting nextcloud matrix mailserver git-server

**Product Configurator** 2023-11-14 .. 2023-12-01

A proof of concept where a [chair](#) rendered as a 3D model and based on meta-data about the 3D model a number UI elements are dynamically generated. So that same binary application could be used show how many different products can be configured. Only the frontend was made. [Repo](#)

Rust egui three-d GitHub cross-platform web windows linux

**delamat.se** 2023-09-04 .. ongoing

A sideproject where the plan is to make a website where users can share recipes and shoppinglists. The main purpose of this sideproject is learning how to use htmx and axum in practice. [Repo](#). Website: *Not yet deployed*.

Rust CSS HTMX axum sqlx GitHub open-source

**halfedge lib** 2023-05-24 .. ongoing

I have been frustrated with available libraries for rust and python for boolean operations on 3D-models. Therefore I started this project that aims to provide an opensource rust library with python bindings. The ambition is to provide robust boolean operations on halfedge datastructures. The project is heavily inspired by the white paper: [Exact, robust, and efficient regularized Booleans on general 3D meshes](#). [Repo](#).

Rust 3D-Modeling GitHub open-source

**Web Resume** 2023-02-01 .. ongoing

I maintain my resume as a website and the source code is available at [GitHub](#).

HTML CSS Tera Zola SSG open-source GitHub

**WASM Web App** 2023-01-01 .. 2023-01-10

Implemented [Conway's Game of Life](#) as a [webb app](#) using rust. [Repo](#)

WASM Rust HTML CSS GitHub

**Python Cad Library** 2022-12-01 .. ongoing

I contribute to the capabilities of [MADCAD](#), an opensource python CAD library.

Python Numpy PyTest open-source GitHub

**Daily Driver: NixOS** 2022-11-01 .. ongoing

I use Linux for both work and personal projects. Currently I use NixOS and benefits from the robust development environments it offers.

Linux Nix

**Embedded Rust** 2022-07-01 .. 2022-10-01

I made simple data acquisition firmware using rust for stm32 and nrf52 development boards. As a compliment I also made a desktop app to plot values from the devices.

Rust USB nrf52 stm32

**The Rust Book** 2022-05-01 .. 2022-07-01

Taught myself rust using the [Book](#) and fell in love.

Rust

## FORMAL EDUCATION

*Just a starting point...*

**Master: Mechanics** 2016-08-01 .. 2018-06-01

At **Jönköping University** I studied product development, materials engineering and design optimization.

SolidWorks CATIA FEA MatLab Visual Basic

**Project: Solar Car** 2014-08-01 .. 2015-12-01

Designed and built a solar powered car. Competed with the car in the [World Solar Challenge](#), a 3000km long race on the public roads of Australia.

*Role & Responsibilities*

System Engineering, Battery and Solar Panel design, CNC-machining.

SolidWorks FEA MasterCam Arduino

**Bachelor: Mechanics** 2012-08-01 .. 2017-06-01

At **Jönköping University** I studied product development, materials engineering and design automation.

SolidWorks FEA MatLab Visual Basic PLC
